

# AJ Bell Cautious Ready-made portfolio half-yearly update

As of 31/12/2019

## Commentary

Over the second half of 2019, the Cautious portfolio delivered a return of 3.37%, making an overall return of 11.40% since launch on 12 December 2018. Across this half-year, all holdings in the portfolio enjoyed positive returns, with notable performances coming from Investec UK Alpha and Fidelity Global Special Situations.

Despite the many risks threatening global growth, it was another strong period for investment markets. The rhetoric coming from central banks in the developed markets shored up investor sentiment once again, with bonds and shares both up over the period. Whether they can continue to make further progress during 2020, given the uncertain backdrop, is the million-dollar question.

Since switching from Janus Henderson UK Property PAIF to Janus Henderson UK Absolute Return in March 2019, we've made no further changes to this portfolio. Our annual asset allocation review is due to take place soon – if we make any changes as a result, we'll let you know.

## Portfolio rating

The risk rating of the portfolio depends on the type of assets it invests in. Bonds are more conservative because they offer a more certain (though typically lower) return. Shares are more aggressive because they offer a less certain (though typically higher) return.

Keep in mind this applies over the longer term: five years or more.
