

# AJ Bell Income Ready-made portfolio half-yearly update

As of 31/12/2019

## Commentary

Over the second half of 2019, the Income portfolio delivered a return of 4.56%, making an overall return of 15.15% since launch on 12 December 2018. In the second half of 2019, all holdings in the portfolio enjoyed positive returns, with notable performances coming from Man GLG UK Income and Trojan Income.

Despite the many risks threatening global growth, it was another strong period for investment markets. The rhetoric coming from central banks in the developed markets shored up investor sentiment once again, with bonds and shares both up over the period. Whether they can continue to make further progress during 2020, given the uncertain backdrop, is the million-dollar question.

Since removing Janus Henderson UK Property PAIF and increasing our holding of First State Global Listed Infrastructure, we've made no further changes to this portfolio. Our annual asset allocation review is due to take place soon – if we make any changes as a result, we'll let you know.

## Portfolio rating

The risk rating of the portfolio depends on the type of assets it invests in. Bonds are more conservative because they offer a more certain (though typically lower) return. Shares are more aggressive because they offer a less certain (though typically higher) return.

Keep in mind this applies over the longer term: five years or more.
